

Table of contents

Grover's Algorithm from First Principles

A complete undergraduate path from quantum basics to designing and using quantum search algorithms

Read each section in order. Every title can be opened as a TheoryTrace document.

- Cover
- Copyright
- How to read this book
- Introduction
- Chapter 1: Why Quantum Search Matters
- Chapter 2: Complex Numbers, Vectors, and Inner Products
- Chapter 3: Qubits and Quantum States
- Chapter 4: Measurement and Probability
- Chapter 5: Quantum Gates and Circuits
- Chapter 6: Reversible Computation and Oracles
- Chapter 7: The Unstructured Search Problem
- Chapter 8: Phase Kickback and Phase Oracles
- Chapter 9: Creating the Uniform Superposition
- Chapter 10: The Diffusion Operator
- Chapter 11: One Full Grover Iteration
- Chapter 12: The Geometry of Amplitude Amplification
- Chapter 13: How Many Iterations Are Needed
- Chapter 14: Complexity and the Quadratic Speedup
- Chapter 15: Multiple Solutions and Unknown Solution Counts
- Chapter 16: Building Practical Grover Oracles
- Chapter 17: Worked Example: Searching a Small Space
- Chapter 18: Using Grover in Quantum Programming Frameworks
- Chapter 19: Noise, Hardware Limits, and Real Devices
- Chapter 20: Amplitude Amplification Beyond Search
- Chapter 21: Applications and Misapplications
- Chapter 22: From Grover to Future Quantum Algorithms

- Conclusion

Document information

Table of contents

Project	Grover's Algorithm from First Principles
Document	Primary document
Author	mujirin
Verifier	Not verified
Downloaded	July 03, 2026 17:12 KST
