

## Chapter 18: Bound States and Nonrelativistic QED

This section is already in the book plan, but it has not been written fully yet. The book owner can press Generate section to write this part with the language model connected to TheoryTrace.

Section plan:

Connects QED to atomic physics through the nonrelativistic limit, Coulomb potential, fine structure, hyperfine effects, Lamb shift, positronium, and the logic of NRQED as an effective field theory.
