

## **Chapter 10: QET in Spin Chains**

This section is already in the book plan, but it has not been written fully yet. The book owner can press Generate section to write this part with the language model connected to TheoryTrace.

Section plan:

Studies QET in one-dimensional lattice systems such as Ising and Heisenberg-type spin chains. Readers learn how distance, correlation length, energy gap, criticality, and measurement choice affect teleported energy.
