

Chapter 19: QET, Quantum Communication, and Quantum Networks

This section is already in the book plan, but it has not been written fully yet. The book owner can press Generate section to write this part with the language model connected to TheoryTrace.

Section plan:

Compares QET with quantum teleportation, entanglement swapping, remote state preparation, and LOCC protocols. The chapter explains how QET might fit into future quantum networks as an energy-information primitive.
