

Chapter 21: Open Problems in Quantum Energy Teleportation

This section is already in the book plan, but it has not been written fully yet. The book owner can press Generate section to write this part with the language model connected to TheoryTrace.

Section plan:

Maps the frontier of the field: scaling laws, optimal protocols, multipartite QET, strongly interacting systems, finite-temperature QET, experimental verification, resource theories, gravitational connections, and the search for practical advantage.
