

Chapter 7: The Basic Logic of Hotta's Quantum Energy Teleportation

This section is already in the book plan, but it has not been written fully yet. The book owner can press Generate section to write this part with the language model connected to TheoryTrace.

Section plan:

Presents Hotta's core idea step by step: Alice performs a local measurement that injects energy, sends the measurement outcome to Bob, and Bob performs a conditional local operation that can extract energy from his region. The chapter explains why the extracted energy comes from the many-body system, not from the classical message.
