

Chapter 19: Software Tools and Practical Workflows

This section is already in the book plan, but it has not been written fully yet. The book owner can press Generate section to write this part with the language model connected to TheoryTrace.

Section plan:

Introduces practical tools such as Qiskit, PennyLane, Cirq, and D-Wave Ocean. Shows how to build circuits, encode QUBO problems, run simulations, use cloud hardware, collect results, and interpret outputs.
